## Four Axis Motion Control Module

### For Modicon 984<sup>®</sup> Series Controllers

The MMC 188/40 motion control module is an intelligent linear motion control sub-system for use with the Modicon<sup>®</sup> 800 series I/O. The module provides a highly integrated solution to control the position of four servo axes. The MMC 188/40 senses position using magnetostrictive linear displacement transducers (Temposonics<sup>™</sup>) and controls the associated output based on programmable parameters. Drive outputs can be configured to work with hydraulic valves and servo drives.
