

FOR IMMEDIATE RELEASE

Wade Nylund Joins Delta in Project and Quality Management Role

September 17, 2018 – Battle Ground, WA – Delta Computer Systems, Inc., a leading motion control innovator and manufacturer, is pleased to welcome Wade Nylund to its team.

Mr. Nylund has over 18 years of manufacturing engineering and supply chain management experience gained with a variety of multi-national Fortune500 corporations. His experience developing and teaching curriculum to internal and external production teams is a valuable resource to Delta’s continuous incremental process improvement. Wade has qualified and managed vendor factories in many Southeast Asian countries, including Southern China, Thailand, Malaysia, and Singapore, and has enjoyed experiencing new cultures and places. He was also able to indulge his enjoyment of the outdoors by hiking in many of these countries! And his expertise with product labeling and packaging has already been felt at Delta, where he managed the production of new packing materials for the RMC200 product line.

Wade is a native of Washington State, and enjoys activities like fishing, hiking, and skiing in the beautiful mountains of the Pacific Northwest. He graduated with honors from Western Washington University, earning a B.S. in Manufacturing Engineering Technology.

Jacob Paso, Delta’s Motion Products Development manager, says, “We are happy to have such a deeply experienced replacement for Delta’s retiring talent. Wade’s high level of technical competence combined with expertise in quality and standards compliance is a great fit for the high performance and reliability that customers have come to expect from our products.”

“Also,” says Mr. Paso, “Wade’s addition to Delta’s team demonstrates our commitment to continuous incremental improvement, not only in our products, but also in our processes. This ensures our customers that Delta RMCs will continue to be best-in-class products for years to come.”

About Delta: For more than 35 years, Delta has supplied motion controllers and other industrial products that enable better performing machines. Delta’s RMC Motion Controllers are used for hydraulic, pneumatic and electric closed-loop control in a wide array of single and multi-axis control and testing applications.
