RMC Motion Controllers

Live Online Technical Training Course

The 8-hour Live Online Training Courses are fully interactive with an actual Delta RMC motion controller for each student (accessed via Internet). The "hands on", instructor-led training covers setup, tuning, programming and diagnostics of RMC motion controllers for closed loop position and velocity control through a series of lessons and lab exercises.

These conveniently scheduled education sessions are a cost effective alternative to Delta's traditional, in person, classroom training, as they eliminate travel and lodging expenses.

Courses offer detailed information on Delta's RMC70Tools or RMCWin software.

To Register:

**Visit www.deltamotion.com/company/education/training.php
or call 360-254-8688 for details on schedule and class outlines.**
