Delta Moves to New, Larger Building

May 4, 2009 – Vancouver, WA – **Delta Computer Systems, Inc.**, a manufacturer of industrial automation products, announces their relocation to a new and larger headquarters building at 1818 SE 17th Street in Battle Ground, Washington effective May 26, 2009.

"We grew out of available space at our old location and, after 25 plus years of leasing the time was right to build our own building," stated Steve Nylund, Delta's CEO. "The new facility is designed to meet present and future requirements, with special features such as ESD flooring throughout the Production area, and a large configurable Training room. The new location in Battle Ground is just seven miles North and still very convenient to Portland International Airport." Nylund added.

Peter Nachtwey, President and chief architect of Delta's motion control products pointed out, "The second story Engineering area is a great collaborative environment for the design team. We intend to continue to drive future growth by investing in development now." The high performance motion control products that Delta designs, manufactures and markets are used worldwide for hydraulic, pneumatic and electric closed-loop control in a wide array of single and multi-axis applications, including energy, plastics, materials testing, aerospace, metals and forest products.

About Delta Computer Systems: For more than 25 years, Delta has been a supplier of motion controllers, color sensors, and other industrial products that enable OEMs and integrators to build better machines and get to market quickly.
